

# SimCorp Dimension

## Axxsys™ and SimCorp Dimension

- Our focus is to ensure that our clients receive the expected return on the investment in SimCorp Dimension (SCD), and get tangible benefits in your business processes and investment decision making, based on the current and future needs of your business.
- Axxsys want to be the leading independent consultancy for SimCorp Dimension clients in the UK, Scandinavia and North America and we believe we can achieve this by ensuring our clients get the operational efficiencies, running cost efficiency and pay back on initial investment in SCD.
- We work in partnership with our clients to ensure that the right decisions, with regard to usage of the application, are made for the right reasons.
- Axxsys provide project management and implementation consultancy on a number of applications, including SimCorp Dimension, as well as post implementation services to the Asset Management and Hedge Fund industry.
- We aim to assist clients already from the analysis phase during the initial implementation, to ensure that the key design decisions are robust & scalable.
- We have specialised in buy-side organisations, and with 10+ years of working with SCD we can help translate your business requirements into system configuration. Axxsys consultants can speed up the decision process since we know the product, understand your business and can make the recommendations when the vendor offer multiple solutions or suggestions.
- Axxsys can provide flexibility to ensure that you get the relevant specialists in the different business areas as and when needed. We currently have 20+ consultants with SCD experience from multiple projects including consultants with 10+ years of experience on the product.
- We started working with SCD clients in 2007 and have since worked with more than 30 clients world-wide to ensure that these organisations reap the real benefits of the investment in SimCorp Dimension.

## Consultancy Expertise - SimCorp Dimension

- Strategic consultancy and implementation skills
- Capacity to take on projects from start to finish
- Flexibility to engage at any point in a project life-cycle
- Skills to address any business or technology problem
- Always driven by our client's strategic objectives

### Why Axxsys Consulting
